
the tool

Generate a sticker from a text prompt with GPT Image 2 or Nano Banana 2, each with a clear credit cost.

How to Make a Sticker with AI

The tool turns a written idea into a finished sticker in three steps — no drawing or design software needed.

1

Step 1: Choose an image model

Select a supported model and review the credit cost shown beside it.

2

Step 2: Describe your sticker

Write a prompt for the subject, style, colors, and mood you want in your design.

3

Step 3: Generate your sticker

Submit the task, wait for the model to finish, and review the result in the workspace. Adjust the prompt for another paid generation.
